ABSTRACT:

The Indian economy is the 10th largest in the world by nominal GDP and the 3rd largest by purchasing power parity (PPP). It is the world 2nd fastest growing major economy after China, with growing rate averaging 7.7% over the past 10 years. Entrepreneurship is the basic business acumen of a successful entrepreneur. The degree and quality of entrepreneurship differs from entrepreneurs to entrepreneur. So the purpose of this study is to explain the entrepreneurship in emerging economies.

KEY WORDS: Entrepreneurship, emerging economies.
