ABSTRACT

Women Entrepreneurship plays a prime role in industrial development. India has always been a land of entrepreneurs and also occupied a strategic position in the Indian economy. Today the village and MSME units account for about 45% of the total industrial production, 30% of the country exports and estimated to employ 96 millions person in over 26 million units throughout the country. The government of India has defined women entrepreneurship based on women participation in equity and employed of a business enterprise. The researcher has taken this topic to identify the industrial profile, to identify the motivating factors of women entrepreneurs and contributing factors to the success and to analyze the relationship between industries related factors and success of entrepreneurs. The researcher has been selected 100 respondents from in and around Chennai City by convenience sampling method. The percentage analysis, weighted average rank analysis and chi-square statistical methods are used for the study.

KEYWORDS: Employed, Entrepreneurship, MSME and Strategic Position.

INTRODUCTION

The word Entrepreneur is derived from the French word “entreprendre” which means a person who undertakes the task of bringing together various resources and manages them to achieve desired results and take some share. Women entrepreneurship in India represents a group of women who are exploring new avenues of economic participation. The entry of the women in organized business is a fairly recent phenomenon. The Government of India has defined women entrepreneurs based on women participation in equity and employed of a business.

STATEMENT OF THE PROBLEM

Traditionally our society is male-dominated and women were not treated as equal partners and they were confined to four walls of the house. In modern societies women have stepped out the house to participate in all sorts of activities. Today with the growth of MSME, many women have plunged into entrepreneurship and are also running their enterprises
successfully. With the relevant education, work experience, improved economic condition and financial opportunities more women are venturing into business.

OBJECTIVES OF THE STUDY

- To analysis the industrial profile of the women.
- To identify the motivating factors of women entrepreneurs and contributing factors to the success.
- To analyze the relationship between industries related factors and success of entrepreneurs.

HYPOTHESIS

- There is no significant relationship between industrial related factors and success level of women entrepreneurs.

METHODOLOGY

Chennai city has been selected for the study. Statistical tools such as percentage analysis, weighted average rank analysis and chi-square analysis are used for the purpose. The primary data was collected through questionnaire by convenience sampling methods.

WOMEN ENTREPRENEURSHIP DEVELOPMENT IN INDIA

The Indian economy has been witnessing a drastic change since mid-1991, with new policies of economic liberalization, globalization and privatization initiated by the Indian Government. India has great entrepreneurial potential. At present, women involvement in economic activities is marked by a low work participation rate, excessive concentration in the unorganized sector and employment in less skilled jobs. Any strategy aimed at economic development will be top-sided without involving women who constitute half of the world population. Evidence has unequivocally established that entrepreneurial spirit is not a male prerogative. Women entrepreneurship has gained momentum in the last three decades with the increase in the number of women enterprises and their substantive contribution to economic growth. The industrial performance of Asia-Pacific region propelled by Foreign Direct Investment, technological innovations and manufactured exports has brought a wide range of economic and social opportunities to women entrepreneurs. In this dynamic world, women entrepreneurs are an important part of the global quest for sustained economic development and social progress.

In India, though women have played a key role in the society, their entrepreneurial ability has not been properly tapped due to the lower status of women in the society. It is only from the Fifth Five Year Plan (1974-78) onwards that their role has been explicitly recognized with a marked shift in the approach from women welfare to women development and empowerment. The development of women entrepreneurship has become an important aspect of our plan priorities. Several policies and programmes are being implemented for the development of women entrepreneurship in India. There is a need for changing the mindset towards women so as
to give equal rights as enshrined in the constitution. The progress towards gender equality is slow
and is partly due to the failure to attach money to policy commitments. In the words of president
APJ Abdul Kalam "empowering women is a prerequisite for creating a good nation, when
women are empowered, society with stability is assured.

MICRO, SMALL AND MEDIUM ENTERPRISES (MSME)

The President under Notification dated 9th May 2007 has amended the Government of
India (Allocation of Business) Rules, 1961. Pursuant to this amendment, Ministry of Agro and
Rural Industries (Krishi Evam Gramin Udyog Mantralaya) and Ministry of Small Scale
Industries (Laghu Udyog Mantralaya) have been merged into a single Ministry, namely,
“MINISTRY OF MICRO, SMALL AND MEDIUM ENTERPRISES (SUHKSHA LAGHU
AUR MADHYAM UDYAM MANTRALAYA)”.

Worldwide, the micro small and medium enterprises (MSMEs) have been accepted as the
engine of economic growth and for promoting equitable development. The major advantage of
the sector is its employment potential at low capital cost. The labour intensity of the MSME
sector is much higher than that of the large enterprises. The MSMEs constitute over 90% of total
enterprises in most of the economies and are credited with generating the highest rates of
employment growth and account for a major share of industrial production and exports. In India
too, the MSMEs play a vital role in the overall industrial economy of the country. In recent years
the MSME sector has consistently registered higher growth rate compared to the overall
industrial sector. With its agility and dynamism, the sector has shown admirable innovativeness
and adaptability to survive the recent economic downturn and recession.

As per available statistics (4th Census of MSME Sector), this sector employs an estimated
59.7 million persons spread over 26.1 million enterprises. It is estimated that in terms of value,
MSME sector accounts for about 45% of the manufacturing output and around 40% of the total
export of the country.

ANALYSIS AND INTERPRETATION

</tbody>
</table>

Data sources: Primary Data

Since the calculated chi-square value is more than table values so all the hypothesis are rejected. It states that there is significant relationship between the Industrial related factors and success of women entrepreneurs.

**FINDINGS**

1, it is observed that nearly half of the respondents are selling their products with the state.

2, More than 50% respondents are engaged in sole proprietorship
SUGGESTIONS

1. Women entrepreneurs could be trained and educated in order to make the successful with regard to access to capital, marketing of their products, creation of assets, selecting the form of enterprise and the nature of industry.

2. Major problem of women entrepreneurs was lack of access to information technology. In order to be successful in business not only nationally but also internationally they need to be educated on information technology.

CONCLUSION

Women Entrepreneurship plays a prime role in industrial development. It has played very vital role in fulfilling the socio-economic objectives of the nation. Thus MSME is playing a remarkable role in widening the base of industrial entrepreneurship in India. The main reason of success factors to become an women entrepreneur is achievement motivation and human relation. The contribution of the women entrepreneurs with the help of MSME to our national economy cannot be underscored. India has always been a land of entrepreneurs and occupies a strategic position in the Indian Economy.
