ABSTRACT
School climate is an important component of any school. A proper and positive school climate helps in shaping the positive personality of a student. The purpose of this study is to explore the perception of secondary level students towards their school climate. A sample of 358 students was selected from four schools of Aligarh Muslim University: Abdullah Girls High School, S.T.S, Union Girls High School, and Union Boys High School. A research questionnaire was adopted for conducting the study i.e. School Climate inventory from Hatboro-Horsham High School CSCI Report - June 2008. The findings revealed that overall school climate of A.M.U secondary level school is satisfactory.

KEY WORDS- School Climate, Perception, Secondary Level Students.
