STATUS OF FOOD PROCESSING INDUSTRY IN INDIA

PROF. PRAKASH RAMDAS TAMBE

POST GRADUATE COLLEGE OF AGRI BUSINESS MANAGEMENT,
TALEGAON DABHADE, PUNE.

ABSTRACT:
The decade-and-a-half of Indian economic reforms have now reached a stage where it is bringing about changes in the agriculture and food processing sectors. Reforms had more or less bypassed the agriculture sector till recently. However, demographic factors, changing lifestyles and consumer demand for greater variety has increased pressures on the food processing sector to provide products at competitive prices. Experience of large developed agricultural economies has proven that the integration of production and processing stages are a universal feature of efficient food marketing systems in the advanced stages of economic development.

KEY WORDS: Contribution of FPI, Growth of FPI, Supply chain, Major export food & Related Product, SWOT Analysis of FPI, Potential of FPI.
