ABSTRACT

The main purpose of this study was to investigate the differences among the offensive, the defensive and the mid-field players of football premier league club players in Ethiopia, in perceived leadership, preferred leadership and satisfaction with leadership. The five leader behaviors which were measured were: training and instruction, democratic behavior, autocratic behavior social support, positive feedback, and. The four aspects of leadership satisfaction, which were measured, were: individual performance satisfaction, team performance satisfaction, training and instruction satisfaction, and personal treatment satisfaction. The study finding indicated that, Player’s satisfaction across different playing position showed no significant difference across players playing at different position.

KEY WORDS: Leadership behaviors, Playing Position.
