ABSTRACT
Women empowerment means all round development which includes their physical, social, economic and political. The issue of women empowerment is on the priority of almost all the democratic societies in their effort to establish a society based on justice and human rights. Political empowerment of women and at producing women leaders in the society, is the utmost need of present world. Political empowerment means women should give proper representation in the political decision making bodies but in reality, women’s are under representation in the Lok Sabha and Rajya Sabha. In this paper, reasons behind the least participation of women in politics is highlight and some useful suggestions are also incorporated which can be helpful in augmenting female participation into politics.

ABSTRACT: Women, empowerment, development.
