BANARAS HINDU UNIVERSITY, VARANASI.

ABSTRACT

The present research paper highlights the social factors (livelihood, family status, e.t.c.) & economical factors (income & expenditure) and tries to analyze the role of MNREGA in socio-economic upliftment of rural population. The paper has been divided into eight sections: the first section outlays the Introduction. The second section deals with the literature review. The third section deals with the objectives of the research paper. The fourth section explains the detailed Research Methodology adopted to carry out the study. The study is descriptive in nature, and the researcher has used both data collection methods i.e. primary data and secondary data. Percentage and graph tools used for the analysis of primary data. The fifth section divided into two parts. First part deals with the objectives, process and the major issues of MNREGA which is based on secondary data and the second part highlights the social factors (livelihood, family status, e.t.c.) as well as economical factors (income & expenditure) and analyze the role of MNREGA in socio-economic upliftment of rural population and which is based on primary data collected from the Varanasi district of Uttar Pradesh. The sixth section presents the findings and concluding remarks of the research attempted for the study. The seventh section deals with the suggestions and would enlighten us to understand the reality of the initiatives. The final section deals with the limitation of the study.

KEYWORDS: MNREGA, Social Factors, Economical Factors, e.t.c.
