ABSTRACT

Women entrepreneurship has been considered as an significant source for economic growth. Women entrepreneurs creates jobs for themselves and for the society also, women entrepreneurship also provides solutions to various business problems, Women entrepreneurs often face gender based barriers and other difficulties like cultural practices, limited mobility and access to information and networks etc in starting and growing their businesses. If all these barriers are removed , Women entrepreneurs can make strong contribution not only to their family but also for the growth of the economic development by eradicating poverty, unemployment and other such problems.

KEY WORDS: Economic development, poverty reduction.
